K-16 Workshop

## Web 2.0: Tasty Technologies

Ten Tempting Tidbits for Technology in Teaching that your Students will Gobble up

This workshop will survey ten “Web 2.0” tools and their realistic applicability to today’s World Language classroom. The afternoon development session will provide the opportunity to explore and create a lesson using the most intriguing tools. We will survey: Blogs, Scrapblog, Virtual Storytelling, Netvibes, Del.icio.us, YouTube & School Tube, Podcasting (audio & video), Unitedstreaming video, Course (Content) Management Software, the ‘Old Skool’ sites - Quia & Conjuguemos, plus some interesting extras if time allows. At the end of this

workshop, participants will have co-created one or more pedagogical uses for each of the ten tools, as well as a whole or partial real-world lesson which incorporates one or more of the web elements. All sites and steps will be provided in reference materials which may be accessed online.

Karen Philabaum-Maginnis teaches French at University High School in Tucson, Arizona. She holds an M.A. from the University of Arizona in French Pedagogy and Literature, with an emphasis on the use of technology in the foreign language classroom.
